

CCS Group would like to advise its customers of a Concrete Industry Seminar

Ash Development Association of Australia

REINFORCED EARTH

Why Does Concrete Do The Things It Does? (Canberra)

When

Wednesday, 29 June 2016
8:30 AM - 5:30 PM

Where

Mercure Canberra
Corner of Ainslie & Limestone Ave , Braddon ACT 2612

Overview

Why does concrete do the things it does? For a product that in its simplest form consists of only 4 materials, it is an incredibly complex and interesting material. Get it right, and you can achieve amazing results. Get it wrong, and the results can be catastrophic.

This seminar is targeted specifically at any one in the concrete construction industry who may use, produce, place, finish, specify, approve or design concrete of all levels of experience and to provide a greater understanding of why concrete behaves the way it does, what can make it change, and what we need to know to be sure it's doing the thing we want it to do!

Prices

CIA Member	\$450.00
CCAA Member	\$450.00
